Good reply #5 Kirk. Check out political philosophy:HELP ME.

My recollection is 666 is in bright red. NYC has the most bizarre method of numbering in the world. There are actual mathematical formulas to be used in determining X streets. 500 Fifth Avenue, for example, is not where you'd logically think it be, at 50th Street, but its at 42nd Street.

The adresses along 52nd Street don't correspond to anything, really: Second Av=987. Third Av=866. Lexington=600. Park=370. Madison=510. Fifth, the Tishman Building=666. Sixth=1301. Seventh=800. Broadway=1687. Numbers get assigned by the City, not the building owner, so blame the Lindsey Administration.

Perhaps Tishman is wearing its like a scarlet letter.

Call your congressperson and find out what HR666 is about.

You'll see the EVIL of the U.S. government.
