My memory is not too great from the 70's but I know there was a bombing in the U.S. Capitol, in a men's room late at night in early 1971, injuring no-one.

Hoover and the FBI immediately blamed this on anti-war activists and later there was an indictment, but no conviction, of a leftist.

Then years later during all the WATERGATE revelations it was discovered that the FBI had planted this bomb in order to discredit the anti-war movement.(Much as they tried to discredit civil rights activists.)>>>  
Or so I seem to remember.

Does anyone happen to know if I am remembering the truth, or someone's propaganda?
