Prosecutors in the criminal "justice" system are only human. A chief trait of human beings is an unwillingness to admit error. There are already thousands of folks in prison who are innocent but there is no rush by their prosecution to use the new DNA techniques to do Justice. Doing Justice reflects badly on prosecutors and hinders their career plans because it is their JOB to put folks away, not free them.

Most prosecutors have not the integrity or courage to stick their red necks out and say "its time for blanket testing"to shake loose the innocent from the claws of a "justice" system that is totally owned and operated by politically ambitious prosecutors who use the high visibility (and free publicity) of their office as a springboard to real power.

Do you suppose, Ron, that a case will surface in which a prosecutor knew a defendent was innocent yet executed the death penalty? Would he be guilty of First Degree Murder? And would he be prosecuted for this crime? Unfortunately, on the National level, many members of the law enforcement conspiracy have gotten away with murder, and not just at Ruby Ridge and Waco. When any of us allow victims of legalized lynching to go un-avenged we are just encouraging the fascists to keep on promoting conflict between People who are natural allies. Divide and conquer is the tactic of the ruling class. They keep on emphasizing superficial differences between groups in their desperate attempt to cling to illegitimate power.

I understand the D.A. in your neck of the woods is pretty enlightened on these matters. Is he very popular there?
