Sounds to me like you're against the idea of a National I.D. Card.

What do you think of the cover-up of the true identity of the Lockerbie bombers? For nearly three years the official U.S. government position was that Syria was behind it. But then, when we needed Syria's aid in Operation Desert Shield, we suddenly found new evidence that pointed to Libya and so we thus welcomed the blood-soaked Assad into the "civilized" world. (Sort of like inviting an ax-murderer to your garden party, or Typhoid Mary to an inner city hospital- nothing but bad luck follows.)

Seems to me we're similarly twisted and entwined with the PRI.
