From: RICK GOMBAS (CHHL71A)

China indeed has never lost a war. She is the world's oldest civilization and has endured countless invasions and occupations only to shake them off and come back the stronger. Some "conquests" of traditional culture oppress longer than others, (the current one has lasted 47 years,) but we (and they) can rest assured that "this too shall pass." The only help they need from us is our unequivocal moral support.
