I like your screwin' angle, although the screwin' the U.S. government does on behalf of Wall Street is multi-faceted.

The targets have not only been Native Americans but Blacks, Hispanics, Asians (especially Japanese,) Jews (for a while,) farmers, working People, small business owners, students, Christians (especially pro-lifers,) gays and the poor. Everyone, in fact, who is powerless and NEEDS a friend but gets instead an adversary. And guess who pays the bills!

Anti-communism was the U.S. government's one redeeming trait but now its been sold out to Beijing, for the profit of Wall Street and it appears the middle-class is NEXT!

And as for keeping agreements...

The treaty Britain made with China in '98 was with a government at least thrice removed from the present one. So why enforce that treaty when the current government refuses to honor the obligations of the prior government insofar as compensating the various individual investors and property holders, firms and governments that had their property seized and bonds dishonored when the communists took power? Indeed, with the spectacle of Western banks quuuing up to lend good money after bad, we might see strapped third-world countries getting on the band wagon and emulating China by dis-avowing THEIR debts to the West.

A true international debtor's cartel, and guess who'll pay the bill?

And guess who's standard of living is steadily diminished by this out-flux of OUR money?

The appetite of the United States government for screwin'

the middle class is undiminished. Revolution now.

Doesn't matter with what the other guy said.

I am very touched with what you write!

God bless America and the American people, like you.

A Hong Kong native,
Tsui Ping.

Oh, I see, England should be more like this country and say the heck with agreements and treaties, and just screw the Chinese much like the United States Screwed the Indians. Hey, if you can't accept the agreement, don't sign would be my apt reply.

Its bad enough that Britain has sold out the six million freedom loving capitalists of Hong Kong who will lose their liberty BY TREATY come July 1 1997, but the United States government has endorsed this outrage. This treachery can be expected of the country that has been the master of the slave trade, colonialist looting and gun boat imperialism, but this abandonment of freedom by the U.S. government shows

how low we've sunk.

Never before has the U.S. government supported the loss of anyone's freedom to communism, but in the case of Hong Kong the U.S. government has made an exception simply to help Wall Street make a financial killing from the sell out.

We fought the cold war for decades opposing communism in Korea, Afghanistan, Angola, Nicaragua, Grenada and Eastern Europe and there is a Wall in Washington dedicated to the memory of more than 58,000 Americans who sacrificed their lives trying to save Asians from communist conquest. But now the U.S. government, in obvious service to Wall Street, has united with arch ally Britain to facilitate the surrender of the six million to the butchers of Tiananman.

Never before has the U.S. government engaged in such treachery. It seems like once we won the cold war we abandoned freedom. Our "leaders" think this is just fine because, believe it or not, its good for business! When they are so eager to abandon liberty in Hong Kong how can We the People trust them to defend OUR liberty?

The government of the United States has proved itself an enemy of freedom by this action. We have allowed it to become a wholly owned subsidiary of Wall Street. The government's reason for being has become to help the rich get richer and more powerful while squeezing out everyone else's money, power and freedom. The American People cannot trust a government that is ready, willing and eager for ANYONE to lose their freedom.

Revolution Now!
